Bordetella Vaccine Release

I give permission to Ralston Valley Canine, to administer a single dose, oral Bordetella vaccination/booster to my dog(s); and,

- I agree that, as the signer, I am responsible for the medical care of this dog, that I am the direct owner of this dog, or I have been given permission by the owner to sign on their behalf (agent of the dog).
- I understand that the Bordetella vaccine may give my dog side effects, including but not limited to, nasal discharge, mild fever, lethargy, and/or loss of appetite. (Symptoms are normal and should not last longer than 1 to 2 days.) From the manufacturer: *“Use of this product can cause inflammatory immune-mediated hypersensitivity reactions and/or anaphylaxis. Antidotes of antihistamines, corticosteroids, and epinephrine could all be necessary based on the severity and nature of the reaction.”* I understand that if my dog experiences any of these side effects that I am responsible for any resulting veterinary care and costs.
- I understand that the Bordetella vaccine is not fool-proof and does not guarantee that my dog will not catch canine “kennel cough.” I understand that this is a live vaccine (Bordetella Bronchiseptica) and can temporarily weaken my dog’s immune system.
- I attest that my dog: 1) is not pregnant, 2) is free from any parasites, and 3) is currently due for Bordetella vaccination (avoid over-vaccination).

The Bordetella vaccine is recommended to be given at least 2 weeks prior to boarding, though may be effective as early as 72 hours after administered.

Dog’s Name(s): _____

Owner Signature: _____ Date: _____

Expiration of this vaccination is 1 Year from the administered date below:

Vaccine Administered by: _____ **(RVC management only)**

Date and Time Administered: _____ Expiration Date: _____
